

Develop a program to find whether the person is eligible for vote or not. And if that particular person is not eligible, then print how many years are left to be eligible.

```
#include<iostream.h>
void main()
{
    int age;
    cout<<"enter the age:";
    cin>>age;
    if(age>=18)
    {
        cout<<"eligible for vote";
    }
    else
    {
        cout<<"not eligible for vote "<< 18-age<<"= years after you are eligible "<<endl;
    }
}
```

A screenshot of a terminal window showing the output of the program. The text is as follows:

```
enter the age:12
not eligible for vote; 6= years after you are eligible
[Program finished]
```
