

```

#include<iostream>
using namespace std;
class student
{
    public:
        int roll_no,m1,m2,total;
        void getdata()
        {
            cout<<"stdudent roll number";
            cin>>roll_no;

        }
};

class test: public student
{
    public:
        void getdata1()
        {
            cout<<"enter marks in m1= ";
            cin>>m1;
            cout<<"enter marks in m2= ";
            cin>>m2;
        }
};

class result:public test
{
    public:
        void getdata2()
        {
            total=m1+m2;
            cout<<"total marks= "<<total;

        }
};

int main()
{
    result a;
    a.getdata();
    a.getdata1();
    a.getdata2();
    return 0;
}

```

}
