

```
#include<iostream>
using namespace std;
int main()
{
    string s1;
    cout<<"enter s1:";
    cin>>s1;
    string s2;
    cout<<"enter s2:";
    cin>>s2;
    if( s1==s2)
    cout<<"both are equal";
    else
    cout<<"both are not equal";
}
```

A screenshot of a terminal window with a dark background. The text is white and shows the execution of the C++ program. It prompts for 's1' and 's2', receives the input 'saveeetha@789' and 'saveeetha@123' respectively, and outputs 'both are not equal'. The prompt '[Program finished]' is shown at the end.

```
enter s1:saveeetha@789
enter s2:saveeetha@123
both are not equal
[Program finished]
```
